Seasonal space heating energy efficiency of package under average climate 5 %

Seasonal space heating energy efficiency under colder and warmer climate conditions

Colder: 5 - 'V' = %
 Warmer: 5 + 'VI' = %

The energy efficiency of the package of products provided for in this fiche may not correspond to its actual energy efficiency once installed in a building, as the efficiency is influenced by further factors such as heat loss in the distribution system and the dimensioning of the products in relation to building size and characteristics.
